

What we do

The impacts of climate change are already affecting people, ecosystems and livelihoods everywhere.

Therefore, we need to transition to a low-emissions economy that can sustain future generations. In the coming years, Member States will need to develop National Energy and Climate Plans (NECPs) to show how they plan to meet their 2030 climate and energy commitments.

In collaboration with **national partners** in 5 countries (**Spain, Italy, Poland, Romania and Hungary**) the PlanUp project closely follows the development of NECPs with specific focus in the **building, agriculture** and **transport** sectors to ensure that they are strong and effective tools to decarbonise Europe.

How we do it

- 1** Build capacity of Local Authorities and Civil Society Organisations to engage in the development and implementation of NECPs.
- 2** Ensure dissemination of good practices and promote well designed, climate friendly sectoral policies
- 3** Improve the understanding of economic and social benefits of climate mitigation actions through quantitative modelling tools

Team

National partners:

Ecodes (ES), Legambiente (IT), Clean Action Group (HU), Polish Green Network (PL), ISD Fundation (PL), GECBucovina (RO), Adept Fundatia (RO)

Plan Up Timeline

Get involved in the discussion on important issues for the low-carbon transition through the PlanUP **Debating Climate**

Find the most relevant information on EU climate & energy, buildings, transport and agriculture legislation in our **Beginner's Guide**

2018

Submission of **Draft NECP**
31 December 2018

Read the **Toolkit** on Effective Engagement in the NECP process

Use the interactive **Map** to discover **Best Practices** in the transport, buildings and agriculture sectors, as well as in public participation and governance

See how your Country has developed the draft NECPs by reading the **Participatory Assessments, National Briefs and Factsheets**

Participate to the **Capacity Building Workshops** —and webinars to get involved in the NECPs process and discuss our analysis

2019

What is your country **Good Practice Policy Scenario?**
Read our report

Join the **Regional Exchanges** to cooperate on NECP development with Local authorities and Civil Society organisations

Your chance to enhance public participation with **Ministry officials roundtables** on effective climate and energy governance

Read our **Report on Climate & Energy Governance** and our **Analysis of Existing Climate policies** and how they could be improved

Check out our analysis on climate policies on the **Policy Monitoring Portal**

2019

EU Commission's **deadline for NECPs**
30 June 2019

Listen to the **Webinar** on how to use the **EU Calculator** model and understand the impact of policy scenarios of draft NECPs

Final NECPs
31 December 2019

2020

Explore the **EU Calculator Model** updated with the latest available data

Participate in our events in Brussels with Ministry officials and at the Covenant of Mayors

Join our **Multi-stakeholder Dialogues** to improve coordination between ministry officials, local and Regional Authorities and civil society organisations on NECPs

2021

Check out our **Final NECP Assessment Report**

Final PlanUp Conference
